Functional and flexible

- » Excavator and drilling mast together produce more than a traditional drill rig and produce faster.
- » The wide movement capability and a 360° turn expands the working area without the need for transportation with crawler.
- » Remote control makes it easy to operate the machine with full control.
- » Modular – quick coupling between the mast and excavator as well as the feed cradle.
- » Universal parts makes it easier to source spare parts on the market.
